ELECTRIC AND GAS METER REGISTRATIONS1 9 5 6

This report, which was formerly compiled and distributed by the Standards Division of the Department of Trade and Commerce under the title "Report of the Standards Division", has become, with the presentation of this issue, an official publication of the Dominion Bureau of Statistics. In this report, the contribution of the Dominion Bureau of Statistics has been largely confined to the compilation of Tables 1, 2 and 4, the remainder being prepared, as formerly, by the Standards Division.

Although the content of the 1956 report is closely similar to that of previous years, the order of presentation has been changed to incorporate into the body of the report tables directly related to electric and gas meter registrations. Data which pertain more generally to the work and organization of the Standards Division appear in the appendices. Tables 1 and 2 which present electric meter registrations by province, and by county or census division are included in this report for the first time; former appendices L and U, the revenue and expenditure statements, have been omitted.

The terms "Electric Meter Registrations" and "Gas Meter Registrations" have been used throughout this report in reference to the number of meters in service as reported by companies engaged in the sale of electricity or gas in applications for certificate of registration. Each company is required to obtain a certificate of registration from the Department of Trade and Commerce not later than the 31st day of March in each year. Applications for certificate of registration filed during the fiscal year ended March 31, 1957, reported the number of meters in service as at December 31, 1956.

The number of meters reported in service by companies engaged in the sale of electricity in Canada rose to 4,571,391 at December 31, 1956 from 4,380,889 one year earlier, an increase of 190,502 or 4.3 p.c. At the end of 1956, meters employed in measuring electricity consumption at urban domestic rates numbered 2,917,108; at urban commercial rates, 417,239; and at urban power rates, 95,997. Meters in rural service were as follows: domestic, 664,318; farm, 379,628; commercial, 87,479 and power, 9,622.

Gas meters in service rose 3.0 p.c. to 955,034 from 927,364 at December 31, 1955. Meters used to measure natural gas consumption increased 18.1 p.c. to 599,633 from 507,875 but meters in manufactured gas service continued to decline, at 350,558 down 15.8 p.c. from the 1955 year-end total of 416,338 and 42.5 p.c. from the record 1950 year-end total 610,096.

### THE STANDARDS DIVISION

#### DEPARTMENT OF TRADE AND COMMERCE

for the Fiscal year ended March 31, 1957

The Standards Division of the Department of Trade and Commerce administers the Electricity Inspection Act, the Gas Inspection Act, the Exportation of Power and Fluids and Importation of Gas Act, the Weights and Measures Act, the Precious Metals Marking Act, and the National Trade Mark and True Labelling Act.

#### ELECTRICITY INSPECTION ACT

This Act provides for approval and inspection of all electricity measuring devices used for billing purposes. The number of meters tested during the year was 1,006,414, an increase of 9,145 over the previous year. Re-tests fell off somewhat but this was more than offset by the increase in new meters. The total number of electricity meters in use in Canada for billing purposes at March 31, 1957 was approximately 4,571,485, an increase of 190,596 over the previous year.

#### GAS INSPECTION ACT

This Act provides for the approval and inspection of all gas measuring devices used for billing purposes. It also provides for the testing of the calorific power of any gas when sold in Canada on a heating value basis. The number of meters tested during the past year was 218,338. Tests on new meters increased by 22,811, while re-tests fell off by 9,619, resulting in an overall increase of 13,192 meters over the previous year. The total number of gas meters in use in Canada for billing purposes at March 31, 1957 was approximately 955,034, an increase of 27,670 over the previous year.

Total revenue under the Electricity Inspection Act and the Gas Inspection Act increased by approximately \$24,203 (to \$933,784) over the previous year and resulted from the corresponding increase in the number of meters tested.

#### EXPORTATION OF POWER AND FLUIDS AND IMPORTATION OF GAS ACT

5,388,135,621 kilowatt hours of electrical energy were exported during the fiscal year as compared with 4,150,746,306 for 1955-56. The export duty imposed was correspondingly higher at \$1,616,440.66. Licence fees for the export of electricity, crude oil and natural gas amounted to \$950 as against \$1,000.26 for the previous year. No additional licences were issued for the importation of natural gas.

#### WEIGHTS AND MEASURES ACT

The Weights and Measures Act provides for the approval and inspection of all weighing and measuring equipment used for trade purposes. For the year ended March 31, 1957, inspectors visited 162,476 business premises and inspected 481,722 devices ranging from counter scales, vehicle scales and other heavy duty scales, including railway track scales, to gasoline pumps and tank trucks. This involved travelling 1,048,322 miles by car, truck, train, boat and air. The R.C.M.P. again assisted in remote northern areas.

The mobile test truck travelled over 12,600 miles in the inspection of 1,118 heavy duty scales. The new volumetric mobile truck for testing large capacity meters was placed in service in May and has proved to be a valuable acquisition for inspectors as well as the petroleum industry. 895 meters in Ontario and Quebec were tested by this unit.

Checking was continued to ensure proper marking on pre-packaged goods and in the short weight field 37,460 scales and 357,599 pre-packaged items were spot checked.

Revenue and expenditure both showed an increase over last year.

#### STANDARDS LABORATORY

The work of the Standards Laboratory is essential to the field inspection programme of the Division. It regularly calibrates the local inspection standards used by field staff, and makes comparisons of the Departmental Standards with the official Reference Standards at specified periods. All new electrical and gas apparatus, weighing and measuring devices are given rigorous tests before being granted approval for use in Canada. In addition, the Laboratory assists in devising new methods and procedures for field inspection work.

The Laboratory is increasingly being called upon to assist industry by checking and calibrating electrical instruments, weights, measures, etc.

#### PRECIOUS METALS MARKING ACT

This Act controls the application of quality marks to articles composed of gold, silver, platinum, palladium, or which are gold- or silver-plated. Constant supervision is maintained on retail, wholesale, imported and manufacturers stocks as well as advertising material, to see that quality marks are applied in conformity with the provisions of the Act. The Branch also assists all sections of the precious metals industry in addition to discharging its own responsibilities.

#### NATIONAL TRADE MARK AND TRUE LABELLING ACT

This Act, as its name implies, provides for the application of the National Trade Mark to commodities under specified conditions, and also for the true labelling of commodities. Regulations are normally drafted after consultation with the particular industry concerned. Regulations enacted to date cover hosiery, fur garments, turpentine, textile materials, and measuring cups and measuring spoons. Considerable progress has been made toward the establishment of standard sizes for a limited range of children's clothing.

## ELECTRIC AND GAS METER REGISTRATIONS

1 9 5 7

The terms "Electric Meter Registrations" and "Gas Meter Registrations" are used throughout this report in reference to the number of meters in service as reported by companies engaged in the sale of electricity or gas in applications for certificate of registration. Each company is required to obtain a certificate of registration from the Department of Trade and Commerce not later than the 31st day of March in each year. Applications for certificate of registration filed during the fiscal year ended March 31, 1958 reported meters in service as at December 31, 1957.

Prior to 1956 most of the data contained in this report were presented in the "Report of the Standards Division" of the Department of Trade and Commerce. The Electric and Gas Meter Registrations report published by the Dominion Bureau of Statistics for 1956 was essentially the same report as that prepared by the Standards Division in previous years. In this year's report all data not relating specifically to electric and gas meter registrations have been eliminated and since meter statistics are reported as at December 31 rather than for the fiscal year ended March 31, the period which formed the basis of the Standards Division Report, table headings in this report have been changed accordingly.

The number of meters reported in service by companies engaged in the sale of electricity in Canada rose to 4,748,636 at December 31, 1957 from 4,571,391 one year earlier, an increase of 177,245 or 3.9 p.c. Meters employed in measuring electricity consumption at urban domestic rates numbered 3,037,793 as against 2,917,108 in 1956. Meters classed as urban commercial rose to 423,018 from 417,239 while those classed as urban power advanced to 97,770 from 95,997. Total meters in urban use went up 3.7 p.c. to 3,558,581 from 3,430,344. Of a total of 1,190,055 reported in rural service, 696,171 were classed as domestic, 392,432 as farm, 90,817 as commercial and 10,635 as power. Comparable figures for 1956 are as follows: total rural, 1,141,047; domestic, 664,318; farm, 379,628; commercial, 87,479; and power, 9,622.

A total of 1,016,079 gas meters was reported in service at the end of 1957, an increase of 6.4 p.c. over the 955,034 recorded in 1956. At year end only 67,726 meters remained in manufactured gas service as compared with 350,558 in 1956 and 610,096 in 1950, the year of peak concentration. Meters in natural gas service rose 57.4 p.c. to 943,783 from 599,633 reflecting the rapid rate of conversion in 1957 from manufactured to natural gas.

## Electricity and Gas Inspection Districts

For purposes of inspection under the Electricity Inspection Act and the Gas Inspection Act the provinces of the Dominion have been divided into the following districts:

District	District Composed Of
Belleville, Ont. ....	Counties of Addington, Frontenac, Haliburton, Hastings, Leeds (Exclusive of the towns of Athens, Newboro and Westport), Lennox, Northumberland, Peterborough, Durham, Prince Edward, Victoria and Ontario.
Calgary, Alta. ....	All that part of the Province of Alberta lying south of the northerly boundary of Township No. 37.
Charlottetown, P.E.I. ....	Province of Prince Edward Island.
Edmonton, Alta. ....	All that part of the Province of Alberta lying north of the northerly boundary of Township No. 37, and the Northwest Territories.
Fort William, Ont. ....	Judicial Districts of Kenora, Rainy River and Thunder Bay.
Halifax, N.S. ....	Province of Nova Scotia.
Hamilton, Ont. ....	Counties of Brant, Haldimand, Halton, Lincoln, Norfolk, Waterloo, Welland and Wentworth.
Kamloops, B.C. ....	That part of the mainland of the Province of British Columbia bounded by the 121st Meridian on the West and the 119th Meridian on the East and the 53rd Parallel of Latitude on the North, also including the valley of the Upper Arrow Lakes and Upper Columbia River Basin to Columbia Lake; and all the towns on the mainland of British Columbia served by the British Columbia Power Commission except the town of Sechelt and surrounding area.
London, Ont. ....	Counties of Bruce, Elgin, Essex, Huron, Kent, Lambton, Middlesex, Oxford and Perth.
Montreal, P.Q. ....	Counties of Argenteuil, Arthabaska, Bagot, Beauharnois, Berthier, Brome, Chambly, Chateauguay, Compton, Drummond, Frontenac, Huntingdon, Iberville, Labelle, LaPrairie, L'Assomption, Missisquoi, Montcalm, Montreal and Jesus Islands, Napierville, Richelieu, Richmond, Rouville, Shefford, Sherbrooke, Soulanges, Stanstead, St-Hyacinthe, St-Jean, Terrebonne, Vaudreuil, Vercheres, Wolfe and Yamaska.
